# Senior Java Developer (m/f/d)

Location: Bratislava, Slovakia

At Exxeta, we challenge the traditional concept of consulting and tech. Every day, more than 1000 colleagues in different locations create digital solutions, change markets and transform mindsets - driven by our passion for technology, our team spirit and the urge to create real impact. In other words: High tech with a heartbeat.

As a Senior Java Developer (m/f/d) you will work in a motivated team on new digital products and service platforms. You will work independently on the design, development and integration of Frontend and Backend components and will be significantly involved in the development of ideas, prototyping, conception and implementation.

(Mobile working is possible)

What awaits you

- Responsibility for the analysis, consulting and implementation of customer requirements regarding architecture, best practices, methods, standards and concepts for the realisation of software solutions within the system landscapes in the area of Java, C#, Python or similar
- Support of complex IT transformations and projects
- Deepening acquired knowledge and actively contributing to our team, e.g. by exploring new topics and technologies
- Great creative freedom and realisation of your own ideas
- Independent and autonomous conception and implementation of complex software solutions on the basis of current technology stacks and agile procedures
- Technical and professional support in the development of new product and solution ideas
- Ensuring the quality of our software solutions, e.g. through code reviews
- Developing new topics and technologies, deepening acquired knowledge and actively contributing to our team
- Responsibility for the continuous improvement of the development process in the team

What we expect from you

- A degree in the field of (business) informatics, comparable courses of study or trainings
- Profound practical experience in software development within the Java ecosystem as well as standard frameworks and databases
- Experience with current tools, methods and processes of modern software engineering
- Enjoyment of complex development tasks and varied projects as well as a passion for software development and a big demand for the quality of the results
- Experience with agile development methods such as Scrum or other agile project procedure models
- Very good knowledge of English – English level B2
- Good knowledge of German is an advantage, as Exxeta s.r.o. mainly supports German projects of Exxeta AG in Germany
- Which technologies you will use:
    - Preferable language Java SE 8 or above
    - Application framework Spring Boot
    - Nice to have frontend technologies such as Angular, React or other JS Framework
    - Nice to have backend technologies such as Kotlin, Python
    - Nice to have knowledge of building application DevOps, microservices architecture

Why Exxeta

- Take on challenging tasks in in-house development
- Develop your skills further through continuous training, conference participation and internal knowledge exchange
- Enjoy a professional environment within a relaxed, friendly corporate culture
- Mobile working? Night owl or early bird? With us you will find enough space for an optimal work-life balance
- Stay healthy – our company supports you with a fixed health budget for individual services

We are a home for tech enthusiasts and doers. Origin, age, preferences - it doesn't matter to us. What counts is that we burn for the common cause. We are already looking forward to getting to know you!
